The design of this family mews house, spanning over four floors, pays homage to the distinctive visual and narrative style of American filmmaker Wes Anderson, and to the avant-garde Hollywood Babylon. With a reconfiguration of space, the family home has become architecturally significant, and it revels in the unexpected: dreamy spaces of gleaming surfaces, clean lines, graphic motifs, and earthy finishes.

It is important that the kitchen, one of the busiest rooms in a home, gets good lighting. Ambient lighting, which provides an area with overall illumination, needs to be complemented by task lighting directly above work areas.

Living room feature wall

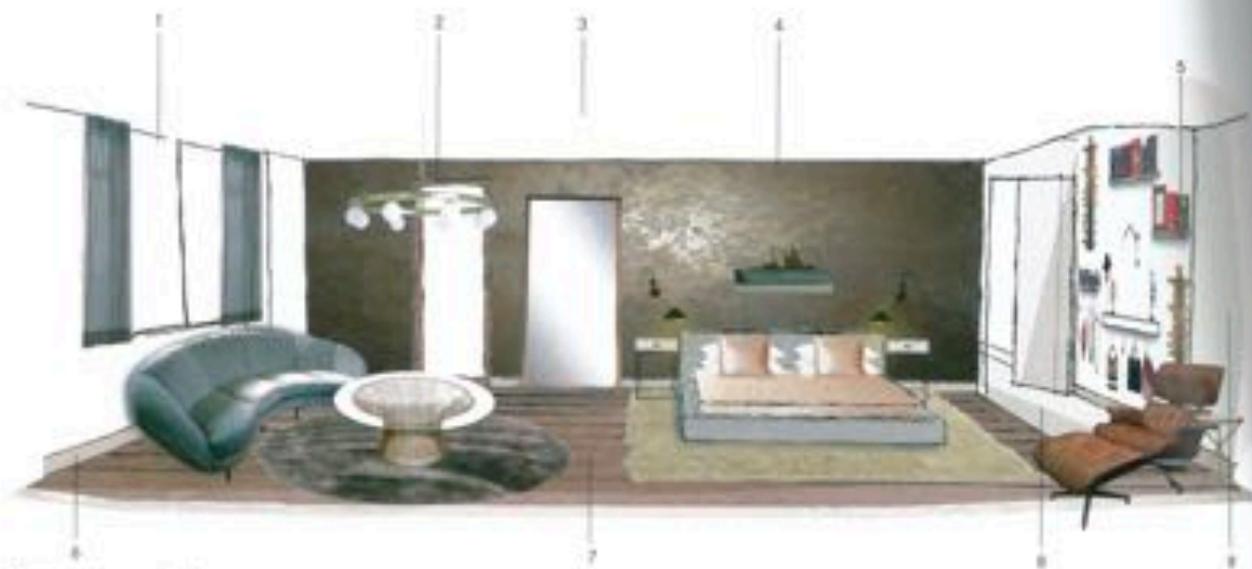

A snug TV corner, a formal seating area with a seventies modular seating arrangement, and a pair of blue velvet chairs complete the trio of spatial pockets, set against the floor-to-ceiling windows and the atrium wall with planters from Ora Home.
